

SIRI SONTHA

Full Stack Web Developer

☎ +91-8660545475 ✉ sirisontha1590@gmail.com 🌐 [linkedin.com/in/siri-sontha](https://www.linkedin.com/in/siri-sontha)

Summary

Self-employed Full-Stack Developer with strong expertise in React.js, MERN stack, and modern frontend development. Experienced in building responsive websites, full-stack applications, API-driven platforms, and interactive UI systems. Skilled in translating requirements into optimized, production-ready solutions using clean code, reusable components, and scalable architecture. Strong problem-solving, version control, and client communication skills.

Skills

Technologies & Frameworks: JavaScript (ES6+), HTML5, CSS3, Node.js, Express.js, React.js, PHP, MongoDB (Mongoose), MySQL, JWT Authentication, bcrypt

Developer Tools: VS Code, Git & GitHub, Postman, Thunder Client, MongoDB Compass, Vercel, Render, Framer, Canva, Browser Developer Tools

Core Development Abilities: Component Architecture, Modular Architecture, Responsive UI, UI/UX Implementation, Cross-Browser Compatibility, API Integration, Debugging & Performance Optimization

Cloud & Databases: MongoDB Atlas, AWS

Experience

Full-Stack — MERN — React Developer

Jan 2024 – Dec 2025

Self-Employed (Remote, India)

- Developed and delivered multiple full-stack applications using the MERN stack, including authentication, API-driven features, routing, and optimized state management.
- Built responsive and scalable UIs with **React.js**, **Tailwind CSS**, reusable components, and modern UI/UX patterns to improve performance and mobile accessibility.
- Designed and implemented secure REST APIs using **Node.js** and **Express.js**, supporting data transactions, dynamic rendering, and third-party API integrations.
- Integrated authentication (JWT, bcrypt), product management workflows, and external data fetching into production-ready applications.
- Collaborated with clients to gather requirements, create wireframes, and convert ideas into functional, optimized web solutions.
- Utilized **Git & GitHub** for version control, managing branches, PR reviews, and deploying builds via Vercel and Render.
- Performed debugging, testing, and performance optimization to ensure fast, secure, and user-friendly applications.

Projects

Recipe Generator Application | *React.js, Node.js, Express.js, MongoDB, JWT, bcrypt*

- Engineered a full-stack recipe management platform using the **MERN architecture**, supporting secure user authentication, dynamic recipe uploads, and real-time content rendering.
- Architected a scalable backend with **modular Express.js REST APIs** for CRUD operations, session validation, and user-specific data pipelines.
- Implemented **JWT-based authentication** and **bcrypt hashing** to enforce protected routes and maintain stateless security across sessions.
- Developed an optimized search pipeline using **MongoDB regex queries** and indexed fields, enabling flexible keyword search and sub-second query responses.
- Built a high-performance UI with **React.js**, reusable components, hooks, and efficient state management to deliver dynamic, engaging user interactions.
- Integrated robust error handling and validation across client and server layers to ensure data integrity and seamless UX.
- Ensured responsive, accessible design with modern UX principles, improving usability across devices and screen dimensions.
- Optimized API communication by reducing payload sizes and minimizing request latency during recipe fetch and update workflows.

Portfolio Website | *HTML5, CSS3, JavaScript, Tawk.to API*

- Developed a fully responsive and SEO-optimized personal portfolio platform using **PHP** and **MySQL**, serving dynamic project and profile content.
- Implemented a highly performant frontend with **JavaScript** and the **Intersection Observer API** to enable lazy loading, animation triggers, and reduced rendering overhead.
- Designed and structured backend logic to manage form submissions and dynamic content rendering while maintaining a clean, modular architecture.
- Created a modern, visually appealing UI featuring custom animations, component-level styling, and accessibility-focused interaction patterns.
- Improved load times through asset optimization, DOM performance tuning, and removal of render-blocking scripts.
- Ensured cross-browser compatibility and mobile-first responsiveness using CSS best practices and progressive enhancement methodologies.

Education

Bachelor of Computer Applications (BCA)

Shree Medha Degree College, Bellary

Graduated: 2026

CGPA: 9.2 / 10
